

NACDD'S Performance Measurement and Evaluation Tool

Zarina Fershteyn, MPH (Director of Program Evaluation, NACDD), Ann Marie Jones, MSW (Data Analyst, NACDD), and Metrecia Terrell, MSPH (Database Manager/Contractor)

BACKGROUND & PURPOSE

- Performance measurement is a cornerstone of continuous quality improvement, and efforts to monitor performance continue to remain a priority within the National Association of Chronic Disease Directors.
- Growing need for a system that collects, stores, analyzes and reports the data from all NACDD's projects, programs, and initiatives.
- Data model was developed from a review of the data systematically collected across all funded projects and programs.
- Framework for the NACDD's Performance Measurement and Evaluation Tool.
- Storage of historical and current data in Caspio cloud database and MS Access database.
- Increased data management and analysis capabilities.
- Reporting of data within and across all projects, programs and initiatives.
- Platform for ongoing evaluation of key programmatic efforts to foster quality improvement within the Association.
