

**Arthritis Council Meeting**  
**Tuesday, April 3, 2018 2:00 PM ET**  
**Call information: 1-866-707-2102, 3489739#**

## **Agenda**

### **1. Call to Order**

CA, CO, MI, MO, MT, NY, OR, UT, NACDD, CDC, NCOA

### **2. National Chronic Disease Self-Management (CDSME) Database**

A presentation and facilitated discussion - Angelica P. Herrera-Venson, DrPH, MPH, Associate Director, Data Management & Evaluation, Center for Healthy Aging (National Council on Aging)

- *See Resource Sheet*
- *See WWE data screen capture*
- *See Webinar recording*

Funding is primarily by the Administration for Community Living (ACL), this is the Center For Healthy Aging 2.0 Database. Helping with the database redesign, is a Salesforce team and developer (on staff). Sound Generations also provides backup on the CDSME database.

There are two components to the database. One is the entry point for workshops and classes, which is where you enter the data. Two is the DOMO, where data is pulled from. With the Domo, data can be used to create visuals and graphics to tell a story about program reach.

#### Quick info:

- The database was established in 2010, with an account for each state.
- Recently, the account process was redesigned to allow for multiple accounts for states that had a need.
- The homepage has three icons, an announcement page, and twitter feed.
- The database can provide info such as hosts, implementation sites, workshops, etc.
- NCOA does analyze and publish the data to help ACL tell the story, or help policy team, etc. The more the database is shared, the broader range of data it contains.
- Data is secure when entered into the database.
- There are two levels of access to the data network – Admin level and data entry only.
- Help for the system is through the “Feed” tab; there is also a Chatter feed; or can email Angelica directly.
- If you have data from another system, your data can be imported into the National CDSME Database; there are guides to walk you through this. Compass, Sound

Generations, Workshop Wizard, etc. are systems where you can import data. Many others too. Data just needs to be formatted with the Excel template provide on the website.

- DOMO page is accessible to all of the active networks; one account per network.

#### Questions:

Question: Can host orgs use the system to enter data, or does the state need to be the user?

Answer: Orgs can enter. There are tools on the website including a webinar that will show how this is done. Host orgs can be given access once they complete a training and the network holder would be responsible for making sure host orgs collect data correctly. Note - Attendance tracking is not the best use of the database; rather reach and performance data would be a better use.

Question: Is there a limit to the number of host org partners that could have access?

Answer: No. You can have hundreds of host orgs; all may not have an acct and they may designate a central person/org to do the entering.

Question: How many data users can you have?

Answer: Hundreds. Up to two hundred or more.

Question: How many accounts to most states have?

Answer: We have two states that have about 22 accounts each but most have about 3-5 accounts.

Question: Does the database have the ability to provide referrals, or can we conduct a search for programs? Like a program finder/locator by state?

Answer: Not at this time. The EBLC has a web locator, however it may not be comprehensive since programs listed must pay a fee. We have tried to work with the AF program finder, but haven't been successful up to this point.

Additional questions can be directed to Angelica P. Herrera-Venson, DrPH, MPH at [angelica.herrera-venson@ncoa.org](mailto:angelica.herrera-venson@ncoa.org)

### **3. Announcements/Other**

- Recommendations for Walking and Walkable Communities was released on March 20 from the National Physical Activity Plan Alliance. A link to the information is [HERE](http://physicalactivityplan.org/docs/NPAP_Recommendations_rept_031518_FINAL.pdf) - [http://physicalactivityplan.org/docs/NPAP\\_Recommendations\\_rept\\_031518\\_FINAL.pdf](http://physicalactivityplan.org/docs/NPAP_Recommendations_rept_031518_FINAL.pdf).
- In case you haven't heard, the first comprehensive arthritis data report was released by CDC last month. A link to the report is available on the CDC Arthritis Program webpage [HERE](https://www.cdc.gov/mmwr/volumes/67/ss/ss6704a1.htm) - <https://www.cdc.gov/mmwr/volumes/67/ss/ss6704a1.htm>.
- There was a new infographic developed by the Osteoarthritis Action Alliance and the American Council on Exercise, on Arthritis and Physical Activity. A link to the infographic can be found [HERE](http://oaaction.unc.edu/arthritis-and-physical-activity-infographic/) - <http://oaaction.unc.edu/arthritis-and-physical-activity-infographic/>.

- The Self-Management Resource Center recently posted a recording of a webinar done by Jennifer Raymond from the Health Living Center of Excellence at Elder Services of the Merrimack Valley. The webinar was on reimbursement through health plans. The recording can be found [HERE](https://www.selfmanagementresource.com/resources/frequently-used-tools) - <https://www.selfmanagementresource.com/resources/frequently-used-tools>.
- Next call is Tuesday, May 1 at 2pm ET

#### **4. Adjourn**

**Next Call Scheduled for Tuesday, May 1, 2018 at 2:00 PM ET**
