

## State Burden

### **NPAO:**

- In 2007, 65% of adults in Iowa were overweight or obese and 14% of high schools students were overweight, based on self-reported height and weight.
  - 81% of high school students and 80% of adults in Iowa consumed fewer than 5 fruits and vegetables per day.
  - 30% of Iowa high school students did not attend physical education classes.
  - 52% of adults in Iowa were not engaged in sufficient moderate or vigorous physical activity.
- Excerpt from CDPHP State Profiles at [www.cdc.gov](http://www.cdc.gov)*

### **Diabetes:**

- 727 adults in Iowa died from diabetes mellitus in 2005.
  - In 2007, 6% of adults in Iowa reported being diagnosed with non-pregnancy related diabetes.
- Excerpt from CDPHP State Profiles at [www.cdc.gov](http://www.cdc.gov)*

### **Heart Disease:**

- Heart disease accounted for 27% of deaths in Iowa in 2005, while stroke caused 7% of deaths.
  - In 2007, 27% of adults in Iowa reported having high blood pressure (hypertension) and 38% of those screened reported having high blood cholesterol, which puts them at greater risk for developing heart disease and stroke.
- Excerpt from CDPHP State Profiles at [www.cdc.gov](http://www.cdc.gov)*

### **Poverty:**

% of people living below the poverty level (2007-2011) = 11.9(*US Dept of Commerce, US Census Bureau*)

## Funding

### **FY 2012 funding level**

FY12 Estimated total: \$1,525,385

### **FY 2014 funding level**

SPHA Basic Award: \$ 513,268

Enhanced Award Requested: \$1,352,400

SPHA Enhanced Award: \$1,022,784

### **Staffing Impact:**

Total FTEs lost 0

## Program Impact:

- It is unknown at this time what the impact will be regarding the actual interventions that will continue to be included in Iowa's plan. We have not yet received the guidance necessary from CDC to determine where/which interventions will not be implemented.
