

DP18-1815 | 2018 – 2019 Performance Measures Snapshot

Diabetes Management

Diabetes is the 7th leading cause of death in the United States. The CDC-funded DP18-1815 cooperative agreement supports all 51 state health departments (including Washington DC) to strengthen prevention and management of type 2 diabetes.

States have increased patients' access to diabetes self-management education and support (DSMES) services through increased referrals, programs, coverage, involvement of pharmacies in delivery, and chronic disease and diabetes self-management program (CDSMP & DSMP) workshops.

TBD% Proportion of people with diabetes with an **A1C > 9**, indicating uncontrolled blood sugar (TBD% of adults) Value will be updated once data are available summer 2020

Note: Based on recipient reported data from September 30, 2018 to June 30, 2019; the number of recipients reporting differs for each measure. A1c measure will be updated at a later date.

DP18-1815 | 2018 – 2019 Performance Measures Snapshot

Diabetes Prevention

States have increased patients' access to the National Diabetes Prevention Program (National DPP) lifestyle change program (LCP) through increased referrals and enrollment, access to coverage, and training for CHWs to decrease the risk of developing type 2 diabetes among adults with prediabetes.

1

4,741,439 Patients served within health care organizations that have systems to identify people with prediabetes and refer them to CDC-recognized organizations (66% of Target)

7,015,567 Patients served (2023 Target)

EHR = Electronic Health Record

2

Who has the **National DPP** lifestyle change program as a covered benefit?

Medicaid beneficiaries*		1,400,167
Private employees & dependents		2,258,288
State/public employees & dependents		1,083,981

*3 states reported Medicaid coverage for the National DPP LCP at baseline

3

63 Academic and other institutions offering CHW core competency training

4,183 CHWs received core competency training

1,468 CHWs received certification

1,541 CHWs paid from sustainable payment mechanisms

4

374,153 participants enrolled in CDC-recognized lifestyle change programs

8,768 participants enrolled in CDC-recognized lifestyle change programs using 1815 funds

635 CDC-recognized organizations achieving a minimum average weight loss of 5% in their eligible participants (41.7% of organizations)

Note: Based on recipient reported data from September 30, 2018 to June 30, 2019; the number of recipients reporting differs for each measure
