NACDD and CDC have facilitated two Learning Collaboratives bringing together state teams of public health and pharmacy partners to accelerate team-based care to manage high blood pressure and high cholesterol. The resources below were shared by the partners during the Learning Collaboratives and webinars. More information about the Learning Collaboratives is available here.

**CDC Pharmacy Resource Page**

- **Pharmacy Resources**
  Pharmacists can use these resources and tools to help improve patient care. Public health professionals can learn about effective strategies to partner with pharmacists.

**Public Health Resources**

- **Methods & Resources for Engaging Pharmacy Partners**
  Resources and methods for public health departments to use to engage pharmacy partners to enhance team-based care and form community-clinical links that result in improved population health.

- **Tailored Pharmacy-Based Interventions to Improve Medication Adherence**
  Public health practitioners and state and local health departments can support use of the Community Preventive Services Task Force recommendation by promoting and helping pharmacies implement tailored pharmacy-based interventions.

**Healthcare Provider Resources**

- **The Surgeon General’s Call to Action to Control Hypertension**
  The Surgeon General’s Call to Action to Control Hypertension (Call to Action) seeks to avert the negative health effects of hypertension by identifying evidence-based interventions that can be implemented, adapted, and expanded in diverse settings across the United States.

- **Embedding Pharmacists into the Practice** (AMA Toolkit)
  Explains what it means to embed a pharmacist within a practice; describes the different roles a pharmacist can play within a practice; identifies skills and qualities a pharmacist should have to provide benefit to the practice; and lists ways to measure the impact of embedding a pharmacist within the practice.
Pharmacist Resources

- **Using the Pharmacists’ Patient Care Process to Manage High Blood Pressure: A Resource Guide for Pharmacists**

  Compiles information about current resources and emerging practices, as well as tools and examples that pharmacists can use to help improve health outcomes associated with cardiovascular disease.

- **Advancing Team-Based Care Through Collaborative Practice Agreements**

  Resource for pharmacists to use in developing and executing collaborative practice agreements in the spirit of advancing team-based care, including a customizable template that can be used as a starting point to developing collaborative practice agreements.

- **Chronic Care Management for Community-Based Pharmacies**

  Background of the Chronic Care Model (CCM) and guidance for developing a provider agreement for CCM.

- **Creating Community-Clinical Linkages Between Community Pharmacists and Physicians: A Pharmacy Guide**

  Describes a framework for creating linkages between community pharmacists and physicians that benefit community collaborators and the patients they serve.

- **APhA Chronic Care Management**

  American Pharmacists Association webpage describing pharmacist participation in Chronic Care Management as clinical staff, with their services being billed incident-to by a qualified provider.

- **APhA Billing and Payment**

  American Pharmacists Association webpage designed to help pharmacists understand existing and emerging opportunities to be compensated for providing certain patient care services through collaborations with other health professionals, state insurers, private insurers and health systems.

APhA also has several SIG groups that pharmacists might be interested in joining for support: [https://www.pharmacist.com/Membership/Get-Involved/Special-Interest-Groups](https://www.pharmacist.com/Membership/Get-Involved/Special-Interest-Groups)
