

# Tennessee Breast and Cervical Screening Program

Fiscal Year 2020 (July 1, 2019 - June 30, 2020)

The Tennessee Breast and Cervical Screening Program (TBCSP) operates in all 95 counties by providing screening and diagnostic procedures for breast or cervical cancer and enrollment into TennCare for treatment for eligible individuals. The TBCSP aims to serve the most vulnerable populations, specifically those who are low-income and uninsured or underinsured.

## Program Eligibility Guidelines:

Tennessee Resident

Income: < 250% Federal Poverty Level

Uninsured or Underinsured

Screening or Diagnostic Age Requirements

Nearly 400 vendors, including local health departments, radiologists, breast centers, and Federally Qualified Health Centers, provide services throughout Tennessee.

## 11,680 women served

Among more than 86,000 eligible women in Tennessee, almost 8% received cancer screening through TBCSP

Over 10,300 breast services provided

194 breast cancers diagnosed

Routine Breast Screenings by Race/Ethnicity

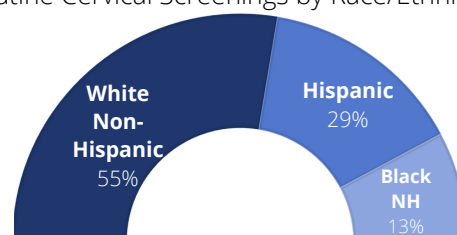

Over 4,300 cervical services provided

234 cervical pre-cancers and cancers diagnosed

Routine Cervical Screenings by Race/Ethnicity

46 men received breast services through TBCSP in FY2020.

Men are eligible for diagnostic breast services if they meet the other program eligibility requirements and can be enrolled in TennCare if breast cancer is diagnosed.
