

Letter from an EWL client

Hello
Up until recently, I depended on your program to help me do some very important screenings, otherwise I honestly wouldn't be doing them or looking for other programs. Cancer runs in my family especially breast cancer and I can't thank you all enough for making this available for me. I now try to do all my screenings but it's all because of your help. I've wrote you all in the past but I want everyone to know how grateful I am and always will be. This is such an important program and I feel so blessed that I was accepted and helped. I needed this to push myself to go for mammograms considering it runs in my family. I hope

everyone that your program helps appreciate this program. Otherwise some of us could be facing struggles right now. I love all you guys and the support you give us ladies.

Thanks a bunch

P.S. I forgot to say that now I have health insurance and will continue ~~to~~ my screenings.
