

# "Ao Ejmour Ao Eddo" Women's Cancer Screening Campaign, 2019 RMI

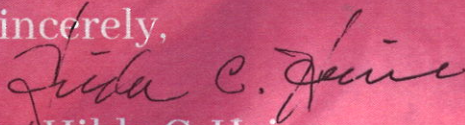

Dear Women of RMI,

I write to ask your help in our fight to address and improve women's health in the RMI. Unfortunately, we have the highest rate of cervical cancer in the world, a highly curable disease with early detection and treatment. Our breast cancer rate is also high, (3rd most common cancer in the RMI) but reversible if we put in the effort and get screened early. We see a number of other cancers, i.e colorectal (colon) cancer on the rise.

As your President, and Jinen Aelon kein, I encourage all of us to make this a priority. We have to do more, for ourselves, for our children, and for each other. In the next few months, WUTMI and MOHHS will be leading a women's health campaign to promote all of us to get checked. I strongly encourage you to participate and put your health first. Take a friend, or go as a group. Do it once a year, or every other year and help us reverse these alarming trends and be stronger together.

Contact WUTMI @ 625-4296 or wutmi26@gmail.com if you need help scheduling an appointment. Awareness opportunities can also be arranged (groups encouraged)

Sincerely,

Dr. Hilda C. Heine  
President, RMI
