DPP Express: Diabetes Prevention Program

Do More With Your Data. The American Diabetes Association® (ADA) is committed to promoting the National Diabetes Prevention Program and making recognized lifestyle change programs accessible to everyone. The ADA's DPP Express allows programs to collect and report their data through a streamlined, user-friendly experience. The Umbrella Network supports organizations that are managing multiple programs including grant recipients, state health departments, collaboratives, and CDC Umbrella Hubs by consolidating subsidiary data in one location.

Security and Privacy

- Access to deidentified subsidiary data
- Subsidiaries feel secure that their data is only being accessed by approved Network Manager

Access to over 125 Data Variables including:

- Required DPRP data variables
- Recruitment activity and recruit information
- Deidentified participant enrollment, demographics, and attendance data
- Cohort data

Evaluate and Conduct Your Own Analysis

- Raw data provided to allow for flexibility to build reports you are interested in
- Data provided at a subsidiary and network wide levels

Additional Reports

- Access an updated 2021 formatted DPRP data submission report
- Coach and cohort level reports

Unlimited Number Subsidiaries

- Subsidiaries must be paid DPP Express users or sign up to be DPP Express users to access their data

Umbrella Network pricing starts at $3,000 for an unlimited number of subsidiaries. Subsidiaries must be paid DPP Express users.
