

# Medicaid Beneficiary Enrollment Initiative

**Umbrella Hub Arrangement Summit**  
September 8 & 9, 2022

The information presented in this presentation has been developed and prepared by the National Kidney Foundation of Michigan. It should not be shared without written permission from a representative of the National Kidney Foundation of Michigan.

# Today's Focus

*The **purpose** of presentation today is to:*

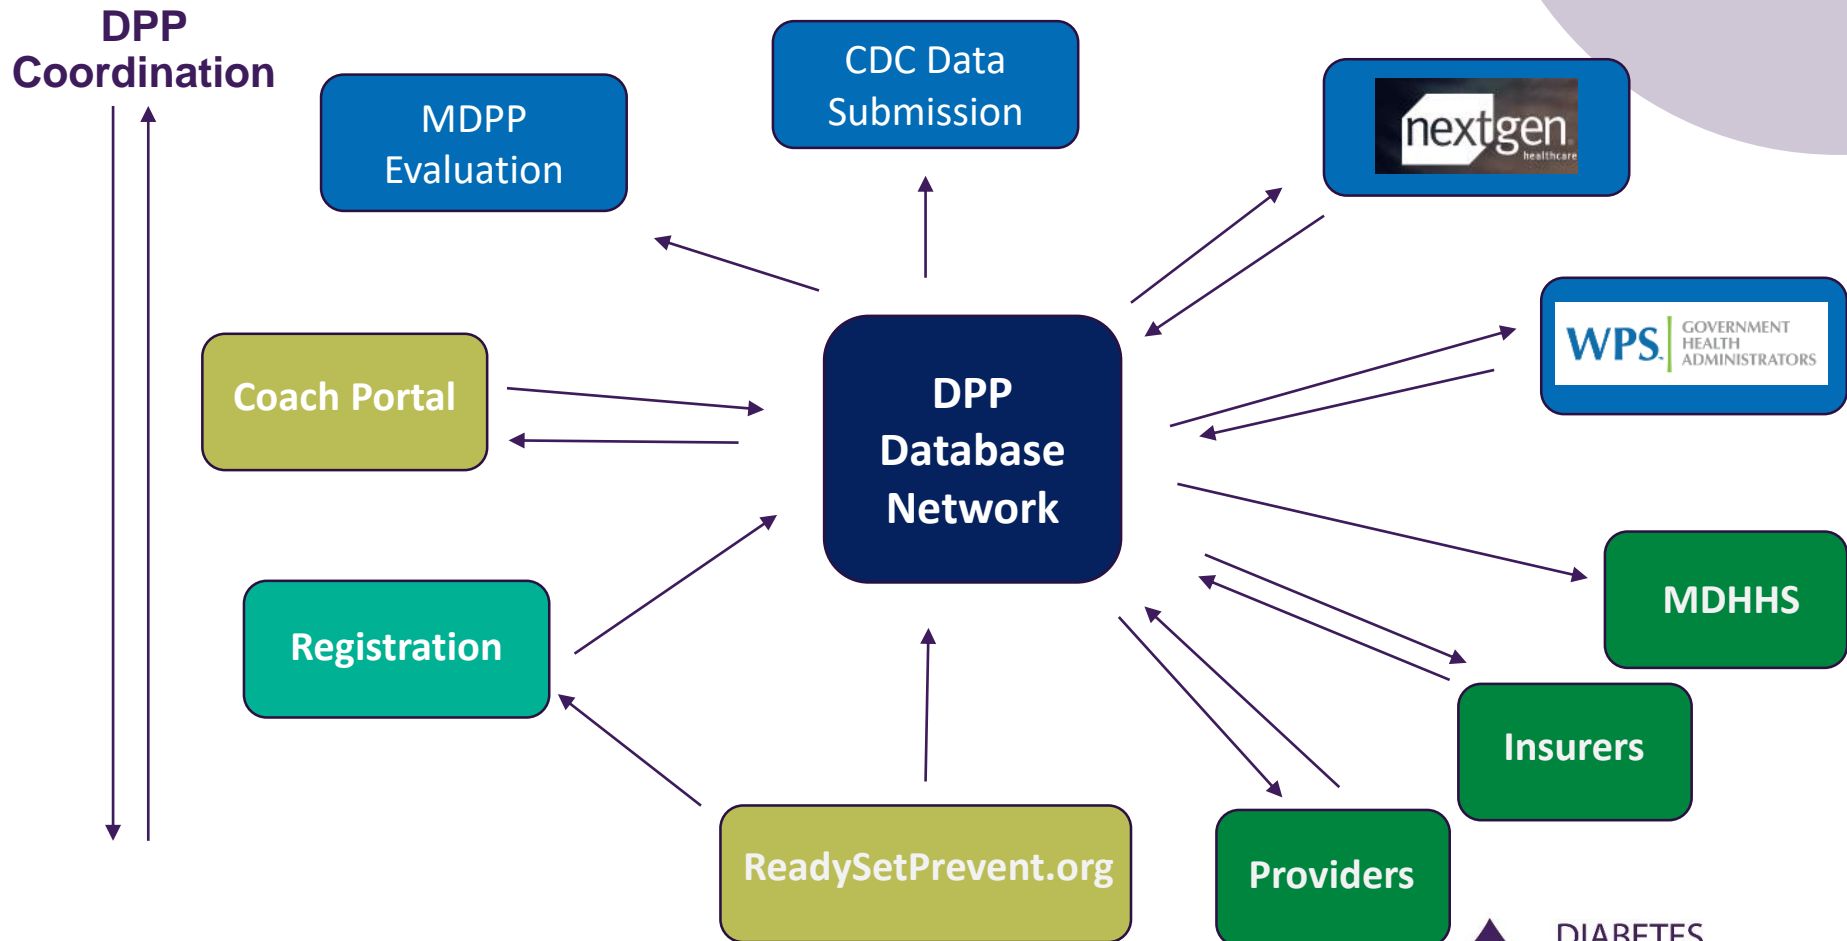

- *Show how our platform supports our UHO model*
- *Share how it aligns with our grant activity*
- *Describe how it can support Michigan Medicaid Plans and their beneficiaries*

# Our Model

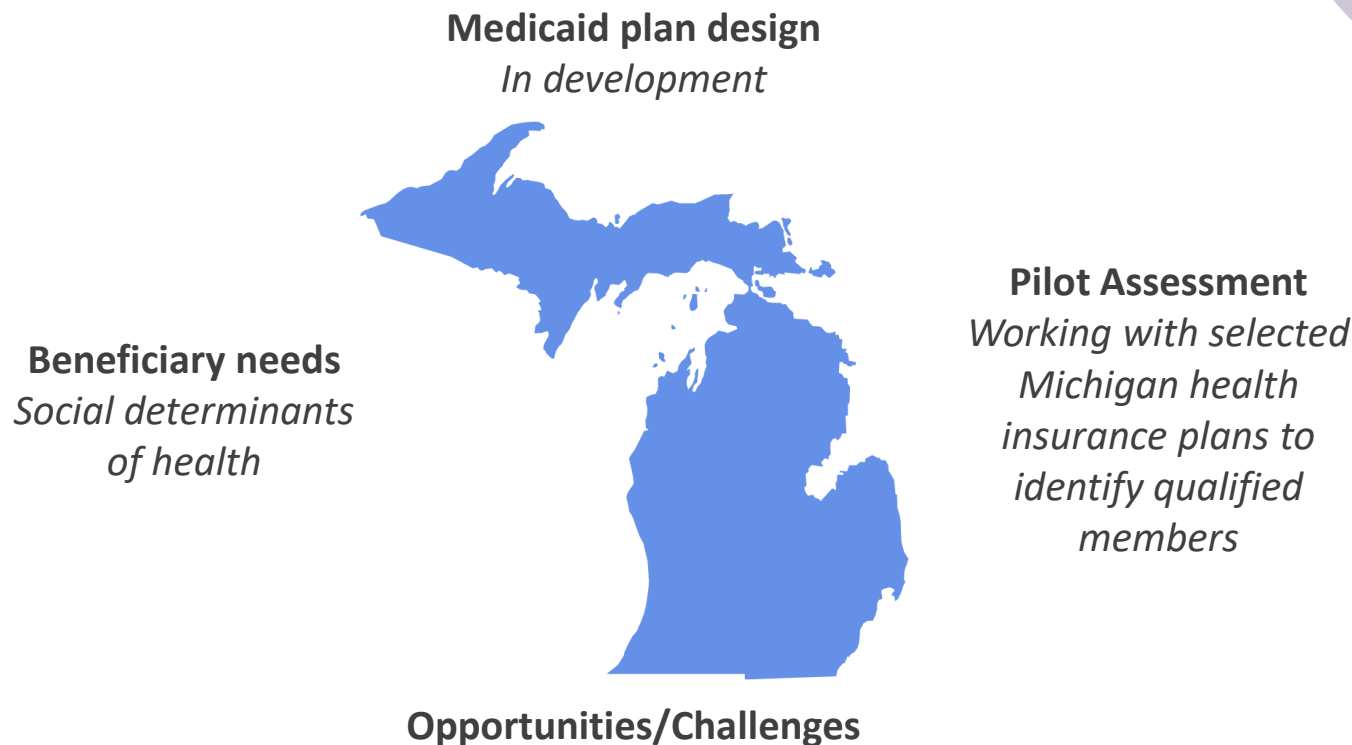

*The purpose of the Medicaid Umbrella Hub Organization (UHO) project is to build state capacity to develop an Umbrella Hub Arrangement (UHA). The UHA aims to increase Medicaid beneficiary access and enrollment in the National Diabetes Prevention Program (DPP) by establishing the National Kidney Foundation of Michigan (NKFM) as the first Michigan DPP UHO. Simultaneously, NKFM will work to enroll 65 Medicaid beneficiaries in DPP. This project moved us in the direction we needed for the grant.*

# Our Platform

# Supporting Michigan Medicaid

# Key Takeaways

Each related components has to work in concert with the other to make the DPP network successful.

1. Our current infrastructure is flexible and fluid.
2. We were providers first. We built our platform based on our deep knowledge of program implementation, coordination, and collaboration.
3. We meet you where you're at and align our platform to fit your program.
4. Our platform provides a sustainable infrastructure based on where the intersection of payment, policy, and program meet.
