

# Why choose the Diabetes Prevention Center's DPP Billing Platform?

*Flexible • Fluid • Community-based*

**Provider First:** The Diabetes Prevention Center (DPC) is a Full Plus provider in both the In Person and Distance Learning modalities. We know what works best . . . that's why we built our own platform.

**Flexible and Fluid:** We built our platform with sustainability in mind. We'll build your system with what you need without boxing you in to a large, bulky platform.

**User Friendly Reporting:** Our platform provides for standard reporting to meet CDC requirements as well as providing engagement, progress, outcomes, and financial reporting including claims based extracts.

**Customer Service:** We seek collaboration with our partners to best understand how our model works with their workflow, creating a successful experience for program participants, coaches, and program administrators alike.

**Community-Based Experience:** The DPC has been providing DPP programming in the community since 2012. As a community-based organization, we know how to best serve other community-based providers.

***Our platform provides a sustainable infrastructure based on where the intersection of payment, policy, and program meet.***

A DIVISION OF THE NATIONAL KIDNEY FOUNDATION OF MICHIGAN

# When You Choose The DPC Platform:

Under the umbrella arrangement, the Diabetes Prevention Center will serve as the sponsoring hub. Subsidiaries will be able to leverage the DPC's existing infrastructure and processes including registration forms, coach portal, data aggregation, aggregate reporting, CDC extract capabilities, and claims submission service.
