

Sage Systems Change Orientation

OVERVIEW

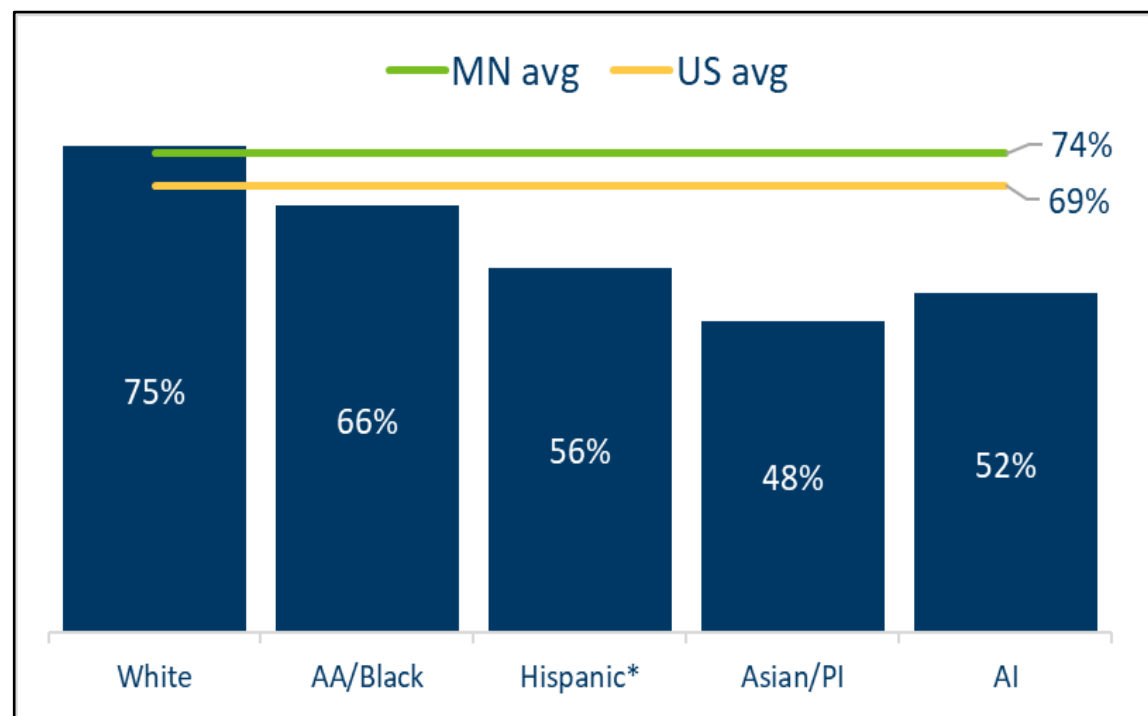

Clinic Systems Change CDC NBCCEDP & CRCCP Programs

Systems Change

Health systems change is a change in organizational policies, processes, or environmental supports that institutionalize improvements in the cancer screening process and lead to increased breast, cervical, and colorectal screening rates in the health system and target populations.

Health Equity

MN CRC screening rates by race/ethnicity. BRFSS 2018.

- The work clinics do is transformative; it can address the structural and systemic causes of health inequities.
- By improving the health of those experiencing the greatest disparities, clinics can improve the health of all Minnesotans.

MDH Comprehensive Cancer Control/Sage Programs (NCCCP, NBCCEDP, CRCCP, WISEWOMAN)

Systems Change (CRCCP & NBCCEDP)

- Partner with primary care clinics and health systems to improve access to screening.
- Provide technical assistance
- Monitor implementation process and outcomes.

The Community Guide

- Evidence-based interventions (EBIs) have been demonstrated to increase breast, cervical, colorectal cancer screening:
 - Patient Reminders
 - Reducing Structural Barriers
 - Provider Reminders
 - Provider Assessment and Feedback
- Clinic selects and implements or enhances at least two EBIs ([The Community Guide](#))

Evidence Based Interventions

- Increase Demand

- Improve Access

- Enhance Provider Service Delivery

Primary Evaluation Outcome

The overall aggregate clinic screening rate over time

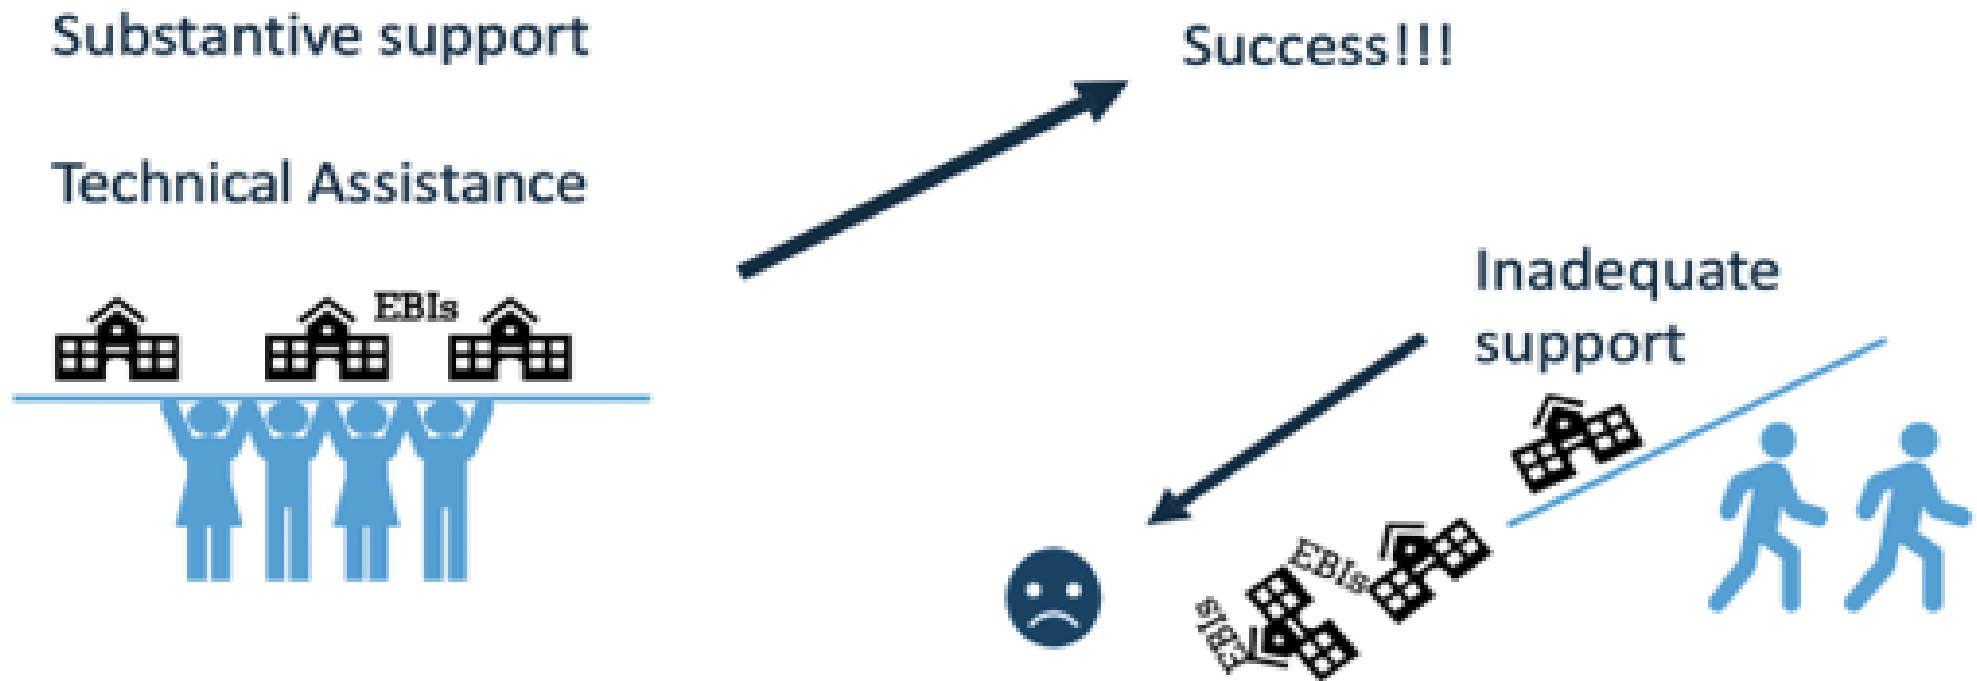

Process Evaluation

“Was the program/intervention implemented as intended?”

MDH Technical Assistance

EBIs: Technical Assistance

Linkage to Follow up Colonoscopy

Sustainability

- Systems change work is most impactful when it is sustainable
- Sustainability is key to community relationships and true change
- MDH Sage programs will work with you to build institutional changes
