

# DC COLORECTAL CANCER CONTROL PROGRAM (DC3C)

## PROGRAM YEAR 4 CLINIC DATA SNAPSHOT

The overarching aim of the 5-year CDC-funded DC Colorectal Cancer Control Program (DC3C) is to increase the colorectal cancer screening rate of age eligible (50 to 74 years) individuals in the District through the implementation of Evidence Based Interventions (EBIs) such as patient reminders, provider reminders, provider assessment and feedback, and patient navigation.

### DC3C PROGRAM HAS EXTENSIVE REACH WITHIN THE DISTRICT

**20,430 PATIENTS**  
**50 -75 YEARS OLD**

**19 CLINICS**  
**204 PROVIDERS**

**15 % POINT INCREASE IN CRC SCREENING RATE FROM 2015-2018**

### REACH INCREASED FROM YEAR 1 TO YEAR 4

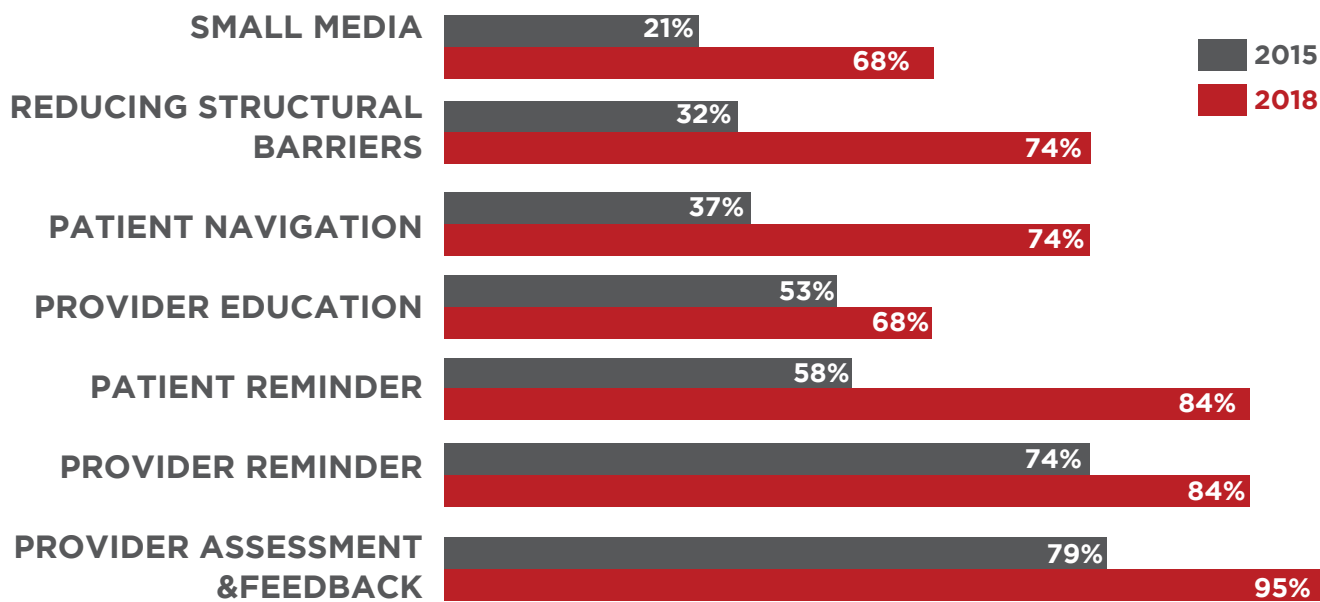

- ↑ Partnering clinics from **14** to **19** clinics
- ↑ Colorectal cancer screening age-eligible patients reached from **19,305** to **20,430**
- ↑ Providers participating by **28%**

### CAPACITY INCREASED FROM YEAR 1 TO YEAR 4

- ↑ Clinics with written colorectal cancer screening policy from **58%** to **79%**
- ↑ Clinics validating screening rates from **58%** to **90%**
- ↑ Clinics monitoring screening rates monthly from **16%** to **42%**

# IMPLEMENTATION INCREASED FROM YEAR 1 (2015) TO YEAR 4 (2018)

Partner clinics **INCREASED THE NUMBER OF EVIDENCE-BASED INTERVENTIONS** implemented to increase colorectal cancer screening from 2015 to 2018

# EFFECTIVENESS CLINICS INCREASED COLORECTAL CANCER SCREENING RATE FROM 2015 TO 2018

\*NOTE: DATA EXCLUDES 5 CLINICS THAT DID NOT PARTICIPATE IN 2018 BUT WERE PART OF THE PROGRAM IN PREVIOUS YEARS.

↑ Number of patients up-to-date with CRC screenings more than **DOUBLED (2,415 TO 5,085)** from 2015 to 2018

## CHARACTERISTICS OF CLINICS WITH HIGH SCREENING RATES

- Clinic Champion
- Multiple EBIs
- Screening Options
- Policy

DC3C recognizes the limitations and barriers to cancer screening that the COVID-19 pandemic has presented to clinics and works with partners to implement strategies that mitigate the effects.
