Promoting Health. Preventing Disease.

COMING UP! CALL IV

Nov. 30, 5:00 p.m. - 6:00 p.m. ET
NBCCEDP Awardees Only

Cushanta Horton, MPH

Branch Head, Cancer Prevention and Control Branch
North Carolina Division of Public Health

Heather Dolinger

BCCHP Manager
North Carolina Division of Public Health

PEER — TO — PEER LEARNING

Peer-to-Peer Learning Year 5 Year 4 Year 3 Year 2 Year 1

YEAR FIVE

Project Description

The P2P Learning program is a grantee-informed learning and engagement opportunity that provides breast, cervical, and colorectal programs a space to share and learn from each other. The program includes webinars, calls, and summaries of innovations. These events are open to all breast, cervical, or colorectal programs who receive cooperative agreement funding from CDC.

Activities

Year five programming includes a colorectal cancer control program virtual training, three P2P Learning call series, and two subject matter expert webinars. The content of these activities were informed by the Awardee Planning Group.

Colorectal Cancer Control Program Virtual Training

Colorectal cancer control program awardees, subject matter experts, and partners gathered virtually to REflect, REcommit, and REignite their program for screening success! The training was held Nov. 1-2 2022 and provided a venue to exchange the latest efforts related to colorectal cancer prevention and control.

Lunch and Learn

Presented by Sharde' Burton and Benji Raap

In partnership w/ Cancer Prevention & Control
Section and the Division of HIV and STI Programs

Teamwork Makes the Dream Work

The Cancer Screening Project or (CaSPr) is a collaboration between the Division of HIV and STI Programs and the Cancer Prevention & Control Section

MDHHS

Division of HIV and
STI Programs

Cancer Prevention and
Control Section

Cancer Prevention and Control Section

The Cancer Prevention and Control Section consists of ten different projects, programs and consortiums:

Lung Cancer

HPV Vaccine

WISEWOMAN

Cancer Survivorship

Ovarian Cancer

Liver Cancer

Young Breast
Cancer Survivors

Prostate Cancer

What are the cancer screening guidelines for PLWH?

- Each type of cancer has its own guidelines.
- CaSPr follows the guidelines presented by the Center for Disease Control (**CDC**), United States Preventative Services Task Force (**USPSTF**), and the American Cancer Society (**ACS**)
- A controlled HIV virus equals normal CDC guidance for colorectal, cervical, breast and lung cancer.

How will the Cancer Screening Project Help?

WE'RE HAPPY YOU ASKED!

**CaSPr helps
in three ways:**

- Education
- Coordination
- Navigation

**Today we will focus
on navigation!**

Client Example

NAME: Pam

Pam is a 52-year-old cisgender Black woman from mid-Michigan living with HIV. She works full-time, but she missed her insurance enrollment period. She has been getting pap smears with her OBGYN since she was younger but has yet to get a mammogram and colorectal cancer screening. She has a history of breast cancer in her family. Several years ago, she lost her aunt to breast cancer. She wants to be proactive about her health, but fears finding out that she may have cancer due to her family history.

Navigation with Pam

Navigationa
Opportunity

HEALTH EDUCATION

The navigator would review breast, cervical, and colorectal cancer screening guidelines and the importance of early detection with Pam.

Navigationa
Opportunity

RISK REDUCTION

Review mammogram importance because of her family history and HIV diagnosis. We would visit the Breast and Cervical Navigation (BC3NP) program to educate on resources available to help.

Navigationa
Opportunity

INSURANCE ASSISTANCE

The CaSPr Navigator would assist this patient by reviewing their insurance coverage options online and enroll Pam into BC3NP.

Navigation with Pam

**PHASE:
WAITING**

SOCIAL SUPPORT

The CaSPr navigator would offer social support that could include listening to her concerns, answering questions, and by taking the patient to <https://www.cdc.gov/hiv/policies/law/states/exposure.html>

**PHASE:
WAITING**

**PEER TO PEER
REFERRAL**

The navigator could arrange a peer support group meeting or one on one at the MDHHS - Peer Recovery Services and Supports (michigan.gov) program for additional support.

**PHASE:
FOLLOW-UP**

**Appointment
Reminders**

The CaSPr Navigator would assist this patient by reminding them of their upcoming appointment.

Navigation

1. Provide a patient **needs assessment**.
2. Create a **cancer screening service plan** that addresses the barriers to cancer screenings. (example: lack of insurance coverage and social support).
3. Help the patient **enroll** with resources available.
4. Provide **appointment reminders**.
5. Constant **communication** with referring provider, care team, case manager and the patient and funded screening resource.

Review

PLWH are at higher risk for lung, cervical, breast, and colon cancers.

PLWH are less likely to get screened, treated, and survive from cancer

CaSPr Provides FREE Education, Coordination, & Navigation
