## YEAR FIVE

### Project Description

The P2P Learning program is a grantee-informed learning and engagement opportunity that provides breast, cervical, and colorectal programs a space to share and learn from each other. The program includes webinars, calls, and summaries of innovations. These events are open to all breast, cervical, or colorectal programs who receive cooperative agreement funding from CDC.

### Activities

Year five programming includes a colorectal cancer control program virtual training, three P2P Learning call series, and two subject matter expert webinars. The content of these activities were informed by the Awardee Planning Group.

#### Colorectal Cancer Control Program Virtual Training

Colorectal cancer control program awardees, subject matter experts, and partners gathered virtually to REflect, REcommit, and REignite their program for screening success! The training was held Nov. 1-2 2022 and provided a venue to exchange the latest efforts related to colorectal cancer prevention and control.
