

Arizona Food and Nutrition Security State Profile

Purpose

The purpose of the Food and Nutrition Security Profile (Profile) is to provide an overview of state and regional efforts and infrastructure to advance food and nutrition security. Although not exhaustive, the Profile serves as a resource to support greater collaboration across disciplines and sectors to improve equitable access to food. The intended audience includes public health practitioners, food policy councils, community-based organizations, food banks and pantries, school district wellness councils, food sovereignty organizations including Indigenous groups and coalitions, and others with a mission to improve food and nutrition security.

The Profile serves as a companion to the [National Food and Nutrition Security Profile](#) and will be reviewed and updated biennially. If you have any questions or comments about your Profile, please contact the Center for Advancing Healthy Communities at CAHCinfo@chronicdisease.org.
