

Innovations in Breast, Cervical, and Colorectal Cancer Screenings

Effective Resources and Strategies

1. Provider Assessment and Feedback Tools

- Electronic Health Record (EHR) Prompts
- [The Guide to Community Preventive Services](#)
- [CDC's Provider Assessment and Feedback \(PAF\) Toolkit](#)

2. Educational Materials and Toolkits

- [CDC Educational Materials](#) (downloadable brochures, fact sheets and infographics for providers and patients).
- [The Guide to Community Preventive Services](#)

3. Patient Navigation and Reminder Systems

- Patient Navigation Toolkit
- Reminder/Recall Systems

4. Academic Detailing

- [CDC's Academic Detailing Guide](#): Training modules and scripts for one-on-one educational visits with providers to promote screening.

5. Performance Feedback and Benchmarking

- **Clinic Dashboards**: Customized reports showing individual and clinic-wide screening rates compared to benchmarks
- **Recognition Programs**: Certificates or public acknowledgement

Online Resources & Tools

- The [CDC's NBCCEDP EHR Toolkit](#) and [CRCCP EHR Integration Resources](#), which offer strategies and examples for implementing reminders and alerts within EHRs for cancer screening programs.
- The [National Colorectal Cancer Roundtable \(NCCRT\) EHR Screening Reminders Toolkit](#), which provides actionable steps and case studies related to reminder systems.
- [Colorectal Cancer Screening: An update to the American Cancer Society Guideline, 2026](#). The American Cancer Society has developed colorectal cancer screening recommendations for people at average risk for colorectal cancer.
