Meet Our NBCCEDP Partners

- WISEWOMAN
- IMS Data Contractors
- National Association of Chronic Disease Directors
- Cancer Council

WISEWOMAN

- NBCCEDP and WISEWOMAN are sister programs connected by Public Law 101-354 and intended to expand preventive services to low-income women.
- WISEWOMAN is an extension of the NBCCEDP to expand preventive services
- Must be NBCCEDP-eligible women aged 35-64.
- Linking the two programs allows women enrolled in the NBCCEDP to receive appropriate cardiovascular disease assessment and risk reduction.

PUBLIC LAW 101-354 AND ITS AMENDMENTS (P.L. 103-183 AND P.L. 105-340)

Title 42. The Public Health and Welfare
Chapter 6a. The Public Health Service
Preventive Health Measures With Respect to Breast and Cervical Cancer
42 U.S.C. § 300k

Note: Amendments to Public Law 101-354 are indicated in bold and italics, followed by a reference to the amending law in parentheses.

§ 300k. Establishment of programs of grants to States

(a) In general. The Secretary, acting through the Director of the Centers for Disease Control and Prevention, may make grants to States on the basis of an established competitive review process for the purpose of carrying out programs—

(1) to screen women for breast and cervical cancer as a preventive health measure;

(2) to provide appropriate referrals for medical treatment of women screened pursuant to paragraph (1) and to ensure, to the extent practicable, the provision of appropriate follow-up services ***and support services such as case management (Women's Health Research and Prevention Amendments of 1998, Public Law 105-340);***

(3) to develop and disseminate public information and education programs for the detection and control of breast and cervical cancer;

(4) to improve the education, training, and skills of health professionals (including allied health professionals) in the detection and control of breast and cervical cancer;

(5) to establish mechanisms through which the States can monitor the quality of screening procedures for breast and cervical cancer, including the interpretation of such procedures; and

(6) to evaluate activities conducted under paragraphs (1) through (5) through appropriate surveillance or program-monitoring activities.

(b) Grant and contract authority of States

(1) In general. A State receiving a grant under subsection (a) may, subject to paragraphs (2) and (3), expend the grant to carry out the purpose described in such subsection ***through grants to public and nonprofit private entities and through contracts with public and private entities (Women's Health Research and Prevention Amendments of 1998, Public Law 105-340).***

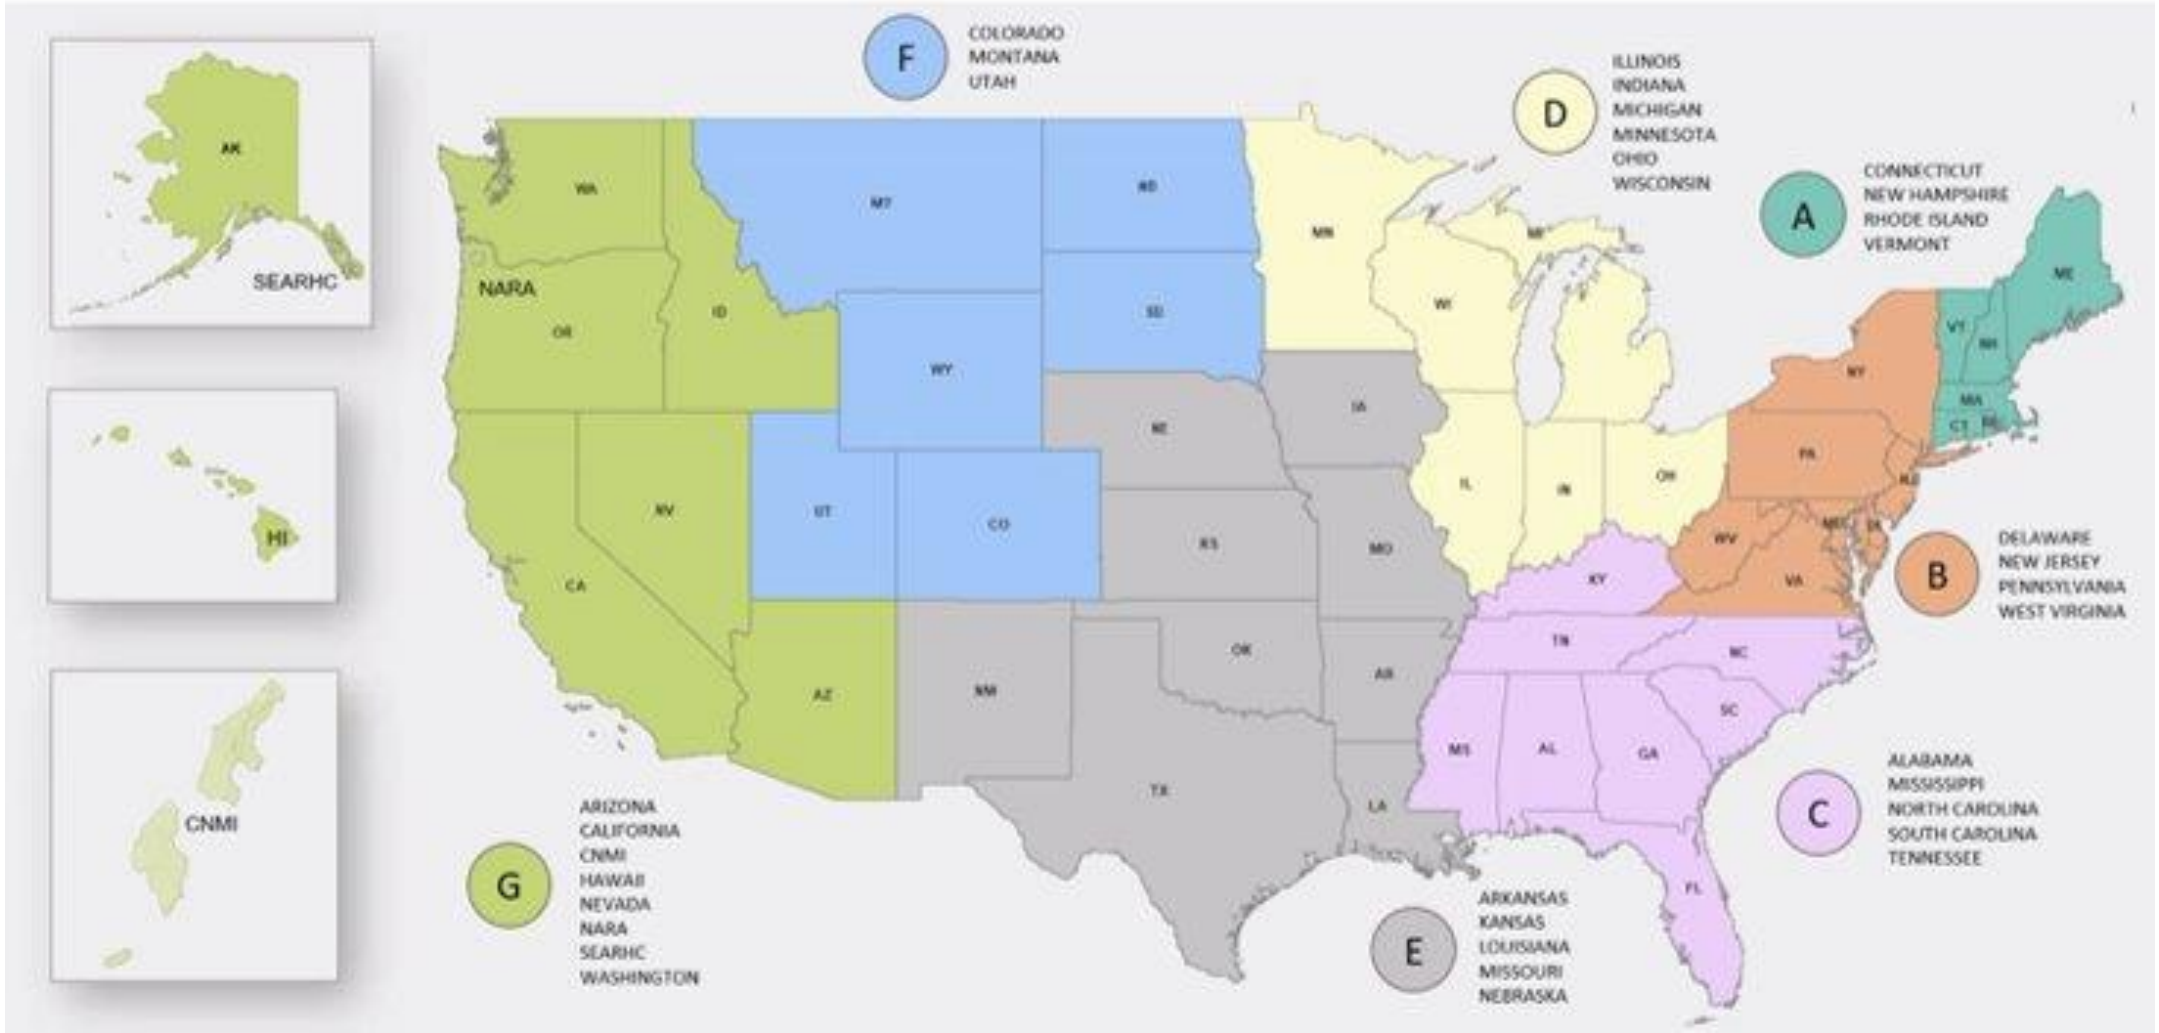

(2) Certain applications. If a nonprofit private entity and a private entity that is not a nonprofit entity both submit applications to a State to receive an award of a grant or contract pursuant to paragraph (1), the State may give priority to the application submitted by the nonprofit private entity in any case in which the State determines that the quality of such application is

Enhancing Cancer Program Grantee Capacity through Peer-to-Peer (P2P) Learning Program

Peer-centered environment for **sharing challenges, lessons learned, and brainstorming solutions**

- Hosted by NACDD in partnership with CDC
- SME Webinars on timely cancer screening topics
- P2P call series to share lessons and challenges
- Topics generated by grantees

Ensure that your CDC-funded cancer program staff and colleagues also are on the mailing list by emailing us any staffing updates.

Find slides, recordings, and other resources at https://www.chronicdisease.org/page/p2plearning.

About the Cancer Council

The NACDD Cancer Council represents the programs/recipients of **four CDC-funded cancer prevention and control programs**: National Breast and Cervical Cancer Early Detection Program (NBCCEDP), National Comprehensive Cancer Control Program (NCCCP), National Program of Cancer Registries (NPCR), and the National Colorectal Cancer Control Program (CRCCP)

- **Vision**

The NACDD Cancer Council, through strong membership and partnerships, strengthens state, tribal, and territorial/ and public health jurisdiction capacity and works collaboratively—working to achieve a cancer-free tomorrow.

- **Mission**

The NACDD Cancer Council engages its members as a **collective and unified voice of public health cancer programs**, including but not limited to state, tribal, and territorial and public health jurisdiction cancer programs, dedicated to addressing cancer and associated risk factors through *mentorship*, *professional development*, *resource sharing*, and *national partnerships*.

Questions and Answers for NBCCEDP

Question 1: One of our providers wanted to know if NBCCEDP pays a referral fee for new clients in addition to the CPT fees.

Answer: No. NBCCEDP does not pay a referral fee to refer patients into the program.

Question 2: We have a client who received a biopsy of the left axillary lymph node and was diagnosed with invasive breast cancer in December 2025. With the lymph node result, the provider now recommends a second biopsy of a different areas of the same breast that looks suspicious. The patient has insurance that would cover up to the Medicare Part B rate. Will NBCCEDP cover additional costs association with this second biopsy?

Answer: The patient's biopsy should be submitted under her insurance. If the patient has a large deductible or cost-sharing and she otherwise meets the program's eligibility criteria, then the patient can be enrolled in the NBCCEDP as underinsured. However, the program cannot pay what the insurance will cover and if the insurance covers up to the Medicare Part B rate, then the program would not reimburse anything additional for the biopsy.

Question 3: A provider has a patient who is two years past her due date for her routine mammogram and is currently breastfeeding. The provider is concerned that a mammogram may not provide clear imaging due to lactation and would prefer that the patient have a breast MRI. Would the program cover the MRI in place of the mammogram?

Answer: Patients who are lactating should undergo mammography with tomosynthesis with a consideration of having a breast MRI however the breast MRI should not be done in place of the mammogram. The program can pay for both tests. These articles may help: https://ajronline.org/doi/10.2214/AJR.20.23905 https://pubs.rsna.org/doi/full/10.1148/rg.230014

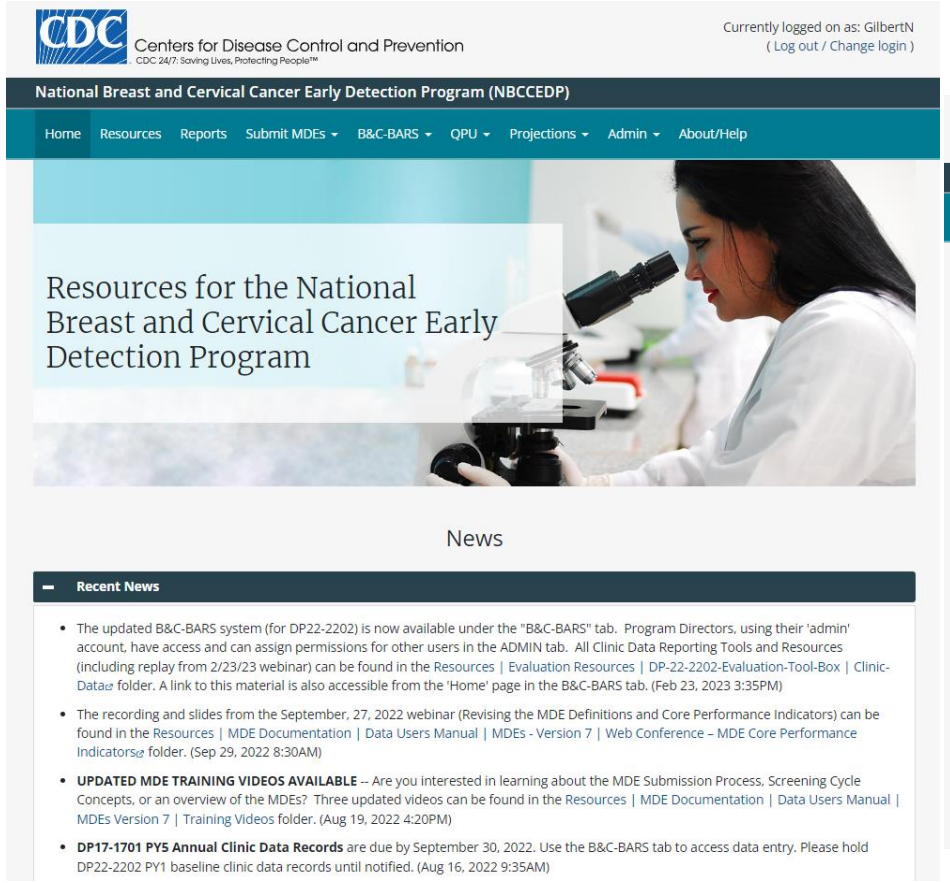

Question 4: Has the 2026 CMS Fee Scheule been released and has the 2026 NBCCEDP CPT Code list come out yet with allowable CPT codes for NBCCEDP?

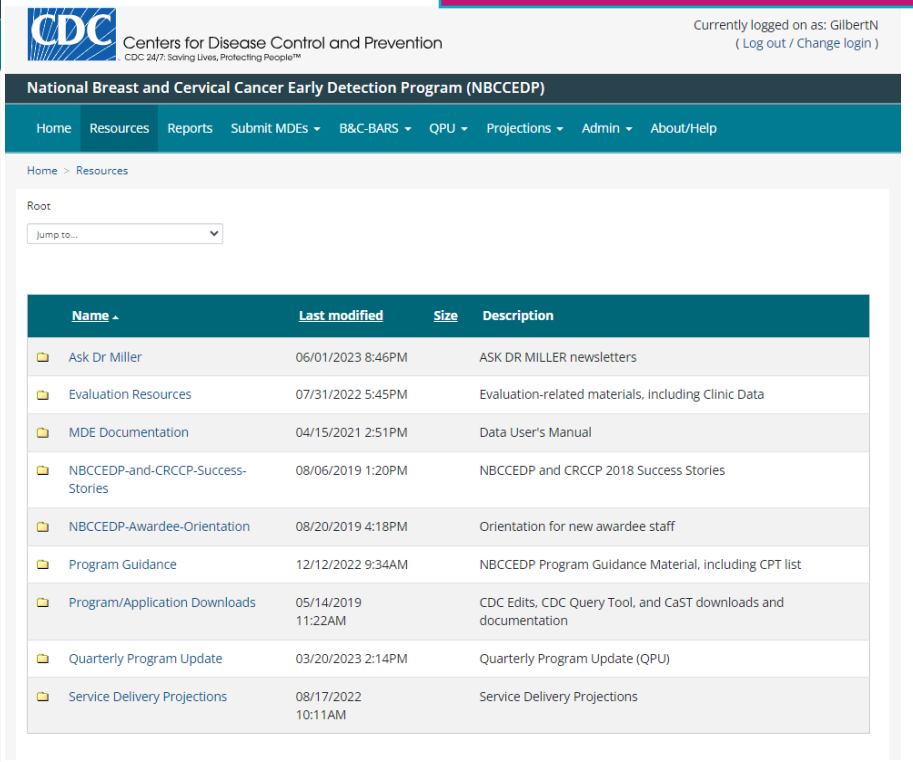

Answer: Yes, the fee schedule can be found here: Physician Fee Schedule | CMS and the NBCCEDP 2026 CPT code list was shared in a blast in December 2025. Previous blast emails can be found at www.nbccedp.cdc.gov.

Benefits of AMP

KNOWLEDGE SHARING

- Categorized and searchable **resources and guidance** when you need support
- **Comprehensive access** to contacts related to the grant
- Dedicated **training materials area** to facilitate onboarding

PERFORMANCE MONITORING

- **Uniform records** for reporting and comparison purposes
- Work plan data is **automatically included** into APR reporting templates
- Everyone accesses the **latest, most accurate** information

TECHNICAL ASSISTANCE

- Automatic **case triaging**
- **View and share TA** information in one place for greater transparency
- Staff can easily **collaborate to address recipient needs**

Award Recipients

*Enable recipients to successfully deliver outcomes by receiving timely **technical assistance** and **subject matter guidance**, strengthening **communication and performance monitoring**, ensuring program activities remain **aligned with CDC expectations**, and accelerating impact through **effective onboarding.***

UTILIZE AMP EFFECTIVELY

Align

Translate CDC expectations into clear activities

Maintain alignment in AMP

Advise

Receive technical assistance from Program Consultants and Subject Matter Experts to unblock delivery and strengthen execution

Capture recommendations and follow-ups in AMP (i.e., award notes and tasks)

Coordinate

Input data to facilitate **routine performance monitoring**

Bilateral **communication** in AMP

Evidence-Based Cancer Control Programs (EBCCP) Bulletin

We are pleased to share this month's updates from the Evidence-Based Cancer Control Programs (EBCCP) website, a resource developed by the National Cancer Institute to support the dissemination and implementation of research-tested interventions in cancer prevention and control.

This month, we spotlight two important approaches to reducing the burden of cancer: increasing participation in recommended cancer screenings for early detection and promoting regular physical activity to help lower cancer risk.

We are pleased to highlight a new program in our breast cancer screening area. In addition, we encourage you to review the EBCCP physical activity program area featuring evidence-based lifestyle programs and related recommendations, including two programs aimed at increasing physical activity to reduce cancer risk in adults.
